Here at CertificationKits we are proud to announce that we have just released our new Cisco CCNA 200-120 practice exam simulator. You can download the trial version of our CCNA Practice exam here. We are very pleased with the improvements we have been able to include in the new version of this CCNA test engine. As Cisco ducks the CCENT and CCNA exams, we are not attributing the pace, increasing the complexity of our CCNA exam questions. In our practical version of the CCNA exam, you get much more than simple multiple-choice questions. Your Cisco skills will be challenged with many script questions in which you need to refer to the network topology charts along with the Cisco router and the Cisco switch exit. CCNA Practice Exam Options Let's briefly consider some of the options that we have available to us in our CCNA 200-120 practice exam simulator. First, we have the opportunity to choose from three predetermined exam banks. We have set up each of these three CCNA exam banks with the correct balance of questions from each section of the Cisco exam goals to make it as realistic as possible. So it will make it easy for you, you can just choose one of the three exam banks and start your studies. You will receive 50 to 60 questions on the official Cisco exam. So it's also something you get in each of our predetermined CCNA exam banks. We suggest you change the default time from 120 minutes to 90 minutes to make it a more realistic exam experience. Now we understand that as you go deeper into your studies you can just focus on a specific topic like switching. In this case you can just choose a section like the LAN Switching Technology option and enter a number of questions on the topic that you want. You'll notice that our exam sections are on the map directly in the cisco CCNA sections to help narrow the focus of learning as easily as possible. If you choose the option for the training regimen, you will not be able to view the correct answer during the practical exam. So use this option as needed. Now let's look at an example of a question from our CCNA exam simulator. CCNA Practice Exam Notice Advanced features that we have in our CCNA exam practice. You have the option of marking questions to consider later and being able to show the answer to consider the question and answer if you are truly stumped. Now that's where our ccNA exam simulator really shines. Instead of just telling you what the right answer is; We will tell you why the correct answer is correct and explain why all the wrong answers are wrong! This way you can find out what you misinterpreted about an option that you may have chosen incorrectly. This is the key in helping you understand what concepts you really don't understand, what you think you're doing. Another good feature The new CCNA practice exam, if you are interrupted you can also suspend the exam and save the session for consideration later. Then as you complete the exam you can save your results under your your own consider later. This is a great feature if you're just burned out taking a hands-on exam and you want to come back later when you're refreshed to dive back into them in great detail. Finally, when you're complete with the exam, you can print out the test as sometimes you don't just want to look at your computer screen anymore. So if you like what you see, you can purchase the full version of our CCNA practice exam simulator here! Cisco CCNA Routing and Switching Exam Management Time Tips is essential, you get 90 minutes to answer about 70 questions. With that in mind, on average you can spend only one minute and thirty seconds on each question. Notice the key details on the part of the CCNA exam router simulator. Otherwise, both router simulations will significantly reduce your score. When you pass the exam, you will get a dry washboard with the market and the eraser. Not that time for a 10-minute survey before the exam starts to write out a subnet chart and other useful general information. You cannot go back to the previous questions in the exam after the answer has been submitted. Once you send your answer, you can't change the answer. View each question carefully before you press the next question button. This practical CCNA exam will display one question at a time and will not display the answer (s) and/or explanation (s) when you're done. Once you click on, you can't go back and you can't use the Back button in the browser to move on to the previous question; it will lead to a loss of progress and you will have to start over.
