Addressed the issue of screen viewing Reading the book years ago, I find it a handy reference to have at the ready. Many spelling/typing errors need to be fixed, but I'm able to work past it at the moment. I'm glad it's. Having trouble viewing the screen on my iPhone. Looking at the preview it seems as though the iPad version was downloaded on the iPhone. I don't see a menu option in the top left. I would make another choice of the main screen to say to present the gospel. And have complete poems in order to come up with on each napkin. Please correct all wrong written and wrong words!
